TitanHQ™ Phish**Titan**

# Powerful Phishing Protection for M365

## Real-time Protection Against Zero-Hour Phishing Attacks

PhishTitan is the new anti-phishing solution from TitanHQ. It is a cloud-based, AI-driven, enterprise phishing solution that offers additional security for companies using Microsoft 365. It provides advanced phishing protection against malicious email, utilizing the most sophisticated tools in the IT world.

PhishTitan delivers unbeatable anti-phishing accuracy and minimal false-positive results using AI, curated threat intelligence feeds, and end-user feedback.
Protecting against zero-day attacks through multi-faceted analysis of emails, and time-of-click techniques. PhishTitan deploys in minutes and is managed from a single interface, allowing administrators to cleanse multiple inboxes in one click.

25%

25% of phishing emails are marked clean by Office 365 EOP.

71%

71.4% of Microsoft 365 business users suffer at least one compromised account each month.

68%

Windows Defender blocked phishing sites only 68% of the time.

Quick Deployment

## Why PhishTitan is the Best Choice for Protecting M365?

Organizations without robust phishing protection for M365 are vulnerable. PhishTitan enhances your M365 security stance, with automatic incident creation and email bannering, powered by AI analysis and multiple threat intelligence feeds.

What do you get when you add PhishTitan to your Office 365?

With over 345 million paying users, Microsoft 365 is one of the most popular application suites for businesses and has become a popular target for cybercriminals. PhishTitan enhances your security stance by offering an additional layer of security that complements EOP and Defender.

Connecting through M365 APIs, PhishTItan offers effortless onboarding, simple management, additional protective analysis, and the capability for post-delivery remediation across multiple tenants.

How it Works

Move to Trash

Post Delivery Remediation

4. A banner is added to malicious emails

1. Sends email to PhishTitan

M365 Inbox

Multi Layer Protection

Link Rewriter

2. Links are Rewritten

3. Email content is checked using AI and curated feeds

Banner Generation

5. Message sent back into the user inbox with banners

Unparalleled Threat Intelligence & High Detection Accuracy

Using a combination of detection methods PhishTitan offers the highest detection accuracy possible. This puts a stop to phishing attacks by analyzing and identifying threats using:

» LLM intelligence and user feedback.
» Curated threat intelligence data that is unmatched in visibility, coverage and accuracy.
» URL analysis through numerous curated feeds to detect malicious destinations linked from phishing mails.
» Machine learning (ML) detection models that are very effective at adapting to new phishing tactics.

User Experience & Reporting

PhishTitan seamlessly integrates into M365 and:

» Offers an additional layer of security that augments Exchange Online Protection (EOP) and Microsoft Defender.
» Detailed reports and real-time alerts.
» Provides automatic warning of suspect emails.
» Feedback using Outlook add-in.

Training & Support

On top of PhishTitan's technical capabilities, we offer:

» Comprehensive customer support ensuring seamless implementation.
» Webinars and courses to help you efficiently enable all features and educate your users about phishing threats.
