

## NAKIVO Backup & Replication v9.3

# #1 Backup and Site Recovery for Virtual, Physical, Cloud, and SaaS Environments

A fast, reliable, and affordable solution that delivers backup, replication, instant granular recovery, and disaster recovery in a single pane of glass.

## Backup

With NAKIVO Backup & Replication, you can reliably protect your virtual, physical, cloud, and SaaS environments, ensure the consistency of application data, increase backup performance, and reduce backup size.

- **VM Backup:** Create image-based, incremental backups of VMware, Hyper-V, and Nutanix AHV VMs.
- **SaaS Backup:** Back up Microsoft Office 365 data, such as Exchange Online mailboxes and individual emails.
- **Physical Machine Backup:** Create image-based, incremental backups of Windows-based and Linux-based physical servers and workstations.
- **Application Backup:** Create Oracle RMAN backups.
- **Cloud Backup:** Create image-based, incremental backups of AWS EC2 instances.
- **Policy-Based Backup:** Automatically back up machines that match policy rules, which can be based on machine name, tag, size, location, and so on.
- **Backup to Cloud:** Send backups or backup copies to public clouds, including AWS and Azure.
- **Backup to Tape:** Send backup copies to physical tape libraries and AWS VTL; easily manage tape devices, cartridges, and backups.
- **Application Support:** Ensure the consistency of applications and databases, such as Microsoft Exchange, AD, SQL, Oracle, SharePoint, and so on.
- **Log Truncation for Microsoft Exchange and SQL:** Truncate application log files after a successful machine backup.
- **Global Deduplication:** Deduplicate backups across the entire backup repository, regardless of the platform.
- **Swap Data Exclusion:** Automatically exclude swap data from VMware and Hyper-V VM backups.
- **Backup Copy:** Create copies of your backups and send them to a remote site or a public cloud.
- **Instant Backup Verification:** Instantly verify VMware and Hyper-V VM backups; get a report with screenshots of test-recovered machines.
- **Backup Encryption:** Protect your data in flight and at rest with AES 256 encryption.
- **Deduplication Appliance Support:** Send backups to deduplication appliances such as NEC HYDRAsstor, EMC Data Domain, and HP StoreOnce.

- **Over 14,000 paid customers** across the Americas, Europe, and Asia
- **Largest customers protect** 7,000+ VMs, 200+ sites
- **Best of VMworld 2018:** Gold Award for the Data Protection category
- **97.3% customer satisfaction** with support
- **5-star** online community reviews
- **Pricing starts as low** as \$99/socket or \$17 per machine/year

## Operational Recovery

With NAKIVO Backup & Replication, you can instantly recover VMs, files, and application objects directly from deduplicated backups.

- **Instant VM Recovery:** Boot VMware and Hyper-V VMs directly from deduplicated backups; migrate booted VMs to production if necessary.
- **Physical to Virtual (P2V):** Recover physical machines to VMware and Hyper-V VMs.
- **Instant File Recovery to Source:** Browse, search, and instantly restore files and folders to source.
- **Instant Object Recovery for Microsoft Exchange:** Browse, search, and recover individual emails and other Exchange objects.
- **Instant Object Recovery for Microsoft Active Directory:** Browse, search, and recover individual users, user groups and other Active Directory objects.
- **Instant Object Recovery for Microsoft SQL:** Browse, search, and restore individual tables and databases to source.
- **Universal Application Object Recovery:** Instantly recover objects of any application by mounting disks from a backup directly to your production machines.
- **Cross-Platform Recovery:** Export VM disks across platforms to recover VMware VMs to a Hyper-V environment and vice versa.

## Disaster Recovery

With NAKIVO Backup & Replication, you can perform near-real-time VM replication and automate and orchestrate the disaster recovery process with Site Recovery.

- **Site Recovery Orchestration:** Create disaster recovery workflows and perform scheduled non-disruptive recovery testing, planned failover, emergency failover, failback, and data center migration with one click.
- **VM Replication:** Create and maintain VMware and Hyper-V VM replicas, which are identical copies of your source VMs.
- **AWS EC2 Instance Replication:** Create and maintain AWS EC2 instance replicas, which are identical copies of your source instances.
- **Policy-Based Replication:** Automatically replicate machines that match policy rules, which can be based on machine name, tag, size, location, and so on.
- **Application Support:** Ensure the consistency of applications and databases, such as Microsoft Exchange, Active Directory, SQL, Oracle, SharePoint, and so on.
- **Log Truncation for Microsoft Exchange:** Truncate Exchange server log files after a successful machine replication.
- **Log Truncation for Microsoft SQL:** Truncate SQL server log files after a successful machine replication.
- **Replica Verification:** Instantly verify VMware and Hyper-V VM replicas; get a report with screenshots of test-recovered machines.
- **Encryption:** Protect your data in flight with AES 256 encryption.
- **Swap Data Exclusion:** Automatically exclude swap data from VMware and Hyper-V VM replicas.

### Customer Quotes

"NAKIVO Backup & Replication is a steady product that does its job without constant monitoring and controlling. Basically, it provides me with peace of mind."

Andrew Arensburger, IT Manager,  
The University of Maryland

"NAKIVO Backup & Replication is an outstanding product that offers great features and does not break the bank. The product saved management time by 35% and reduced our VMware backup budget by 30%,"

Stivan Chou, Representative  
China Airlines

"The amount of storage space reduction we got with NAKIVO Backup & Replication was truly awesome. We achieved 3X reduction in storage space!"

Roland Kalijurand, IT Manager  
Radisson Park Inn

"NAKIVO Backup & Replication installed on a Synology NAS provides us with reduced deployment time, minimized complexity, and improved VM backup speed for the whole district."

Jeong-Hyun Cho, Systems Manager  
Seoul City Gas

"NAKIVO Backup & Replication has saved us a tremendous amount of time and money. NAKIVO Backup & Replication provided us with a robust and cost-effective VM backup solution for protecting our virtual environment."

Tony Burrus, CTO  
Compton Unified School District

"With NAKIVO Backup & Replication, we have saved more than 50% vs. maintenance of our previous VM backup solution, and have additionally saved 25% more in storage space costs with better deduplication, lowering our backup expenses by 75% overall."

Rick Braddy, Founder and CEO/CTO  
SoftNAS, Inc.

## Performance

With NAKIVO Backup & Replication, you can boost backup, replication, and recovery speeds by up to 2x and reduce network load by as much as 50%.

- **Native Change Tracking:** Use native change tracking technologies (VMware CBT, Hyper-V RCT, Nutanix AHV CRT) to instantly identify modified data and send only changed data to the destination.
- **LAN-Free Data Transfer:** Use the Hot Add or Direct SAN Access modes to increase data transfer speed while offloading production networks.
- **Network Acceleration:** Increase performance in busy LAN and WAN networks with built-in network acceleration.
- **Bandwidth Throttling:** Limit the speed of data transfer by configuring global or per-job bandwidth rules.

## BaaS and DraaS

NAKIVO Backup & Replication provides a simple way to deliver data protection and disaster recovery as a service.

- **Multi-Tenancy:** Create multiple isolated tenants within one product instance and manage them from a single pane of glass.
- **Self-Service:** Offload data protection and recovery tasks to tenants via the self-service portal.

## Ease of Use

NAKIVO Backup & Replication provides a simple web interface and comes with great features to help you save time and money.

- **Calendar Dashboard:** View all past, current, and future jobs in a simple calendar view.
- **Global Search:** Instantly find VMs, backups, replicas, jobs, repositories, transporters, and other objects; act on search results.
- **Self-Backup:** Protect system configuration including all of your jobs, inventory, settings, and so on.
- **Live Chat with Tech Support:** Get help without leaving the web interface.
- **Microsoft Active Directory:** Integrate with Microsoft Active Directory and map user groups to NAKIVO Backup & Replication user roles.
- **API:** Integrate NAKIVO Backup & Replication with monitoring, automation, and orchestration solutions via HTTP API.

## About NAKIVO

NAKIVO is a US-based corporation dedicated to delivering the ultimate backup and site recovery solution. With 20 consecutive quarters of double-digit growth, 5-star online community reviews, 97.3% customer satisfaction with support, and more than 14,000 paid customers worldwide, NAKIVO provides an unprecedented level of protection for physical, virtual, and cloud environments.

## Supported Environments

NAKIVO Backup & Replication can protect the following platforms:

### Physical

- Windows Server 2008R2 – 2019
- Windows 10 Pro. 64-bit
- Ubuntu v16.04–18.04, 64-bit
- RHEL v6.3–7.5, 64-bit
- SLES v12.0–12.4 64-bit
- CentOS v6.6–7.6, 64-bit

### Virtual

- VMware vSphere v4.1 – v6.7
- Hyper-V 2012 – 2019
- Nutanix AHV 5.10 (LTS)

### Cloud

- AWS EC2

## Deployment Options

NAKIVO Backup & Replication can be installed on the following platforms:

### Windows

- Windows Server 2008R2 - 2019
- Windows 7 – 10 Professional (x64)

### Linux

- Ubuntu 16.04 – 18.04 Server (x64)
- Red Hat Enterprise Linux 6.9 – 7.6 (x64)
- SLES 11 SP4 – 12 SP3 (x64)

### NAS

- ASUSTOR ADM v3.2
- FreeNAS 11.2
- NETGEAR ReadyNAS v6.9
- Synology DSM v6.1
- QNAP QTS v4.4
- WD MyCloud v3

## Hardware

NAKIVO Backup & Replication Requires the following hardware configuration:

- **Server:** 2 CPU cores, 4 GB RAM
- **NAS:** Refer to [System Requirements](#)
- **Raspberry Pi:** Refer to [System Requirements](#)
