

Virtualization Manager

Simplified virtualization monitoring and management

Virtualization Summary

The screenshot displays the 'Virtualization Summary' page in SolarWinds Virtualization Manager. At the top, there are links for 'VIRTUALIZATION SETTINGS', 'EDIT', and 'HELP'. Below this, the 'Virtualization Assets' section is organized into three categories: VMware, Hyper-V, and Nutanix. Under VMware, two hosts are listed with IP addresses 10.196.1.92 and 10.196.1.93. Under Hyper-V, one cluster named 'HVCluster1' is shown. Under Nutanix, two clusters are listed: 'LONDON-NUTX-CL01' and 'TestCluster'.

Ultimate end-to-end
visibility for your hybrid IT
environment

SolarWinds® Virtualization Manager (VMAN) is designed to be an intuitive tool for virtualization monitoring, performance management, capacity planning, and optimization across VMware vSphere and Microsoft Hyper-V environments. Virtualization Manager is affordable and easy to download, deploy, and use.

FEATURES

Complete visibility into your entire environment

Monitor VMware vSphere®, Nutanix®, and Microsoft® Hyper-V® environments, whether on-premises or in the cloud—with a single tool. VMAN can also deliver visibility into how your virtualization environment connects to application, server, and storage infrastructure for faster troubleshooting.

Easily access what you need to maximize performance

Get at-a-glance insight into the performance, capacity, configuration, and usage of your virtualized infrastructure, including hosts, VMs, clusters, containers, vSANs, and other datastores. VMAN is also designed to deliver predictive recommendations to address active or potential performance issues. These recommendations can be run immediately, or scheduled to run later—or use batch execution for quicker problem resolution.

Address virtualization issues efficiently

The VMAN console can execute a variety of management actions, including power on/off, suspend, and reboot a VM, or take and delete snapshots. You can migrate VMs to a different host, and VM disks to a different datastore or shared cluster volume. These actions can be triggered manually or through customized alerts or scripts, which can help you optimize your resources without jumping to a separate tool.

Reclaim resources for improved performance and cost savings

You can reclaim virtual resources quickly with VM sprawl alerts and recommendations. VMAN can automatically find idle, stale, and zombie VMs as well as orphaned VMDKs to help you free up storage space and improve overall performance. VMAN can guide you in rightsizing your VMs to recapture CPU and memory resources for further savings.

END-TO-END VISIBILITY

Use Virtualization Manager to access the AppStack™ and PerfStack™ dashboards for end-to-end visibility into application and infrastructure performance, including your virtualization resources.

SYSTEM REQUIREMENTS

[TRY IT FREE](#)

30 days, full version

HARDWARE	MINIMUM REQUIREMENTS*
CPU	3.0GHz quad-core
Memory	8GB + RAM (Recommendations feature requires an additional 8GB)
Hard Drive	20GB (up to 3,000 virtual machines)
	30GB (up to 6,000 virtual machines)
	10GB free disk space

SOFTWARE	MINIMUM REQUIREMENTS*
OS	Windows Server® 2016 or later
Database	Azure SQL Database
	SQL Server 2014, 2014 SP1
	SQL Server 2016 or 2016 SP1
	SQL Server 2017
.Net Framework	.NET 4.8
Web Browser	Microsoft Internet Explorer® version 11 Microsoft Edge®
	Mozilla® Firefox® last two versions
	Google® Chrome® last two versions

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

TRY BEFORE YOU BUY. DOWNLOAD A FREE TRIAL.

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials that deliver full product functionality. Products can be downloaded from the SolarWinds website, and run on-premises in IaaS environments, or deployed in Microsoft® Azure® by the [Azure Marketplace](#).

ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of powerful and affordable IT management software. Our products give organizations worldwide—regardless of type, size, or complexity—the power to monitor and manage their IT services, infrastructures, and applications; whether on-premises, in the cloud, or via hybrid models. We continuously engage with technology professionals—IT service and operations professionals, DevOps professionals, and managed services providers (MSPs)—to understand the challenges they face in maintaining high-performing and highly available IT infrastructures and applications. The insights we gain from them, in places like our **THWACK** community, allow us to solve well-understood IT management challenges in the ways technology professionals want them solved. Our focus on the user and commitment to excellence in end-to-end hybrid IT management has established SolarWinds as a worldwide leader in solutions for network and IT service management, application performance, and managed services. Learn more today at www.solarwinds.com.
