

# SolarWinds Hybrid Cloud Observability

Observability built to drive IT agility and productivity

## AT A GLANCE

SolarWinds® Hybrid Cloud Observability is a comprehensive, integrated, and full-stack observability solution designed to integrate data from across the IT ecosystem, including networks, servers, applications, databases, and more. Hybrid Cloud Observability is designed for organizations of all sizes and industries. Our platform includes built-in intelligence designed to help customers optimize performance, ensure availability, and reduce remediation time across on-premises and multi-cloud environments.

## FEATURES

### Observability for all

Capability and value-based solutions for organizations of any size, no matter where they are in their digital transformation journeys.

### Easy to use

Simple to get started and expand, with powerful capabilities leveraging unified UX, collection, and analytics functions.

### Full-stack and integrated

See across network, cloud, infrastructure, application, and database. Comprehensive and more integrated coverage than point, freemium, and cloud-first vendors.

### Deployment freedom

Flexible hybrid IT implementation from data center to multi-cloud, whether deployed on-premises or self-hosted in AWS, Azure, or GCP.

### Superior value

Integrated portfolio with a lower total cost of ownership (TCO) than combined, point, and free monitoring and management tools.

### Actionable intelligence

Detect anomalies across massive, cross-domain data sets to increase operational efficiency, predictability, and productivity.

### Reduce alert fatigue and risk

An intelligent alert engine built to provide customizable alerts and delivery options, bring you faster remediation, reduce your alert fatigue, and increase automation.

### **Simplified licensing**

Licenses by node based on our annual term subscription model.

### **Cloud-Connected journey**

Cloud-Connected functionality will give customers visibility across the SolarWinds Platform, into both Hybrid Cloud Observability and future SolarWinds SaaS solutions, empowering customers to integrate today and evolve as their business needs dictate.

### **Secure by Design**

SolarWinds is committed to setting a new standard in software development through rigorous adherence to our advanced, multi-layer security framework from SDLC to infrastructure and people.

## **SOLARWINDS HYBRID CLOUD OBSERVABILITY - WHAT WE OFFER**

### **Essentials**

Gain operational visibility into network infrastructure device health, availability, applications, and more with intuitive dashboards and deep analytics.

### **Advanced**

In addition to the functionality offered in the Essentials tier, the Advanced tier enables you to add traffic flow intelligence, endpoint, virtualization management, configuration management, and robust trend analysis for more comprehensive, correlated service delivery insights.

### **Enterprise Scale**

For customers with large, complex, or distributed environments, Enterprise Scale provides greater economies of procurement, scale, and support today and in the future with enhanced support services; additional polling engines, web servers, and high availability; and an Enterprise Operations Console (EOC).

	ESSENTIALS	ADVANCED
Infrastructure, network, and application performance observability	✓	✓
Physical and virtual hosts, device, and VoIP monitoring	✓	✓
Application-centric database monitoring	✓	✓
IP address management	✓	✓
Log management and analysis	✓	✓
Automated discovery and dependency mapping	✓	✓
Historical and real-time dashboards	✓	✓
Intelligent alerting and customizable reporting.	✓	✓
Distributed polling for remote environments	✓	✓
Metric and event correlation and anomaly detection intelligence	✓	✓
Network flow and bandwidth observability		✓
Virtualization performance management		✓
Configuration management for networks, servers, and applications		✓
Enterprise Scale <i>Includes Premier Support, Plus Additional Polling Engines, Web Servers, High Availability, Lab License, Enterprise Operations Console</i>	Optional	Optional

## ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of simple, powerful, and secure IT management software built to enable customers to accelerate their digital transformation. Our solutions provide organizations worldwide—regardless of type, size, or complexity—with a comprehensive and unified view of today’s modern, distributed, and hybrid network environments. We continuously engage with technology professionals—IT service and operations professionals, DevOps and SecOps professionals, and database administrators (DBAs)—to understand the challenges they face in maintaining high-performing and highly available IT infrastructures, applications, and environments. The insights we gain from them, in places like our **THWACK** community, allow us to address customers’ needs now, and in the future. Our focus on the user and our commitment to excellence in end-to-end hybrid IT management have established SolarWinds as a worldwide leader in solutions for observability, IT service management, application performance, and database management.
